

CSR- Integrated Learning

The National Association for the Blind (NAB), headquartered in South Delhi, stands as a pioneer in promoting integrated learning for visually impaired children within various schools across Delhi. Their dedication to inclusivity extends beyond visual impairment, embracing children with other physical and mental disabilities too.

NAB ensures that these children, who face visual challenges, have the same educational opportunities as their sighted peers.

Orbis CSR has played a key role in facilitating these opportunities by generously donating a van. This van simplifies the process of getting the children to NAB. Firstly, it collects the children from their homes and transports them to the NAB. From there, they are seamlessly transitioned onto a school bus, which takes them to their respective schools.

Remarkably, these visually impaired children share classrooms with their sighted children. After the school day ends, the NAB team provides invaluable assistance with coursework, ensuring these children receive the academic support they require to excel. NAB's dedicated coordinators serve as a crucial bridge between the children and their schools, reinforcing their unwavering commitment to making education accessible and empowering for all.

NAB expresses its heartfelt gratitude towards Orbis Financial Corporation Limited for their essential support in this noble cause.
